                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Searched:
Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                GenEmbl:*

MPsrch\_pp protein - protein database search, using Smith-Waterman algorithm

Tabular output not generated. Run on: Fri Apr 30 20:37:57 1999; MasPar time 39.28 Seconds 696.713 Million cell updates/sec

Description: Perfect Score: Sequence: Title: >US-09-034-286-65 (1-496) from US09034286.pep 3630 1 MFRSKRSGLVRRLWRSRVVP......SRQFITSCPCWLEILLNNPR 496

Scoring table: PAM 150 Gap 11

Searched: 180763 seqs, 55169189 residues

Post-processing: Minimum Match 0% Listing first 45 summaries

Database:

1:sp\_archea 2:sp\_bacteria 3:sp\_fungi 4:sp\_human 5:sp\_invertebrate 6:sp\_mammal 7:sp\_mhc 8:sp\_organelle 9:sp\_phage 10:sp\_plant 11:sp\_rodent 12:sp\_unclassified 13:sp\_vertebrate 14:sp\_virus

Mean 48.184; Variance 97.965; scale 0.492

Statistics:

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
